#### **Certificate of Conformance**

We hereby certify that unless otherwise stated, the whole of the supplies detailed herein conform in all respects to Pall specifications. The controls exercised are in accordance with our Quality Management System and where specified by Pall applicable national and international regulatory requirements.

.....Rob Dickstein.....

Quality Representative of Pall Corporation

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

#### FEDERAL AVIATION ADMINISTRATION - PARTS MANUFACTURER APPROVAL

#### -----END OF DATA-----

#### GENERAL NOTES:

- Provide minor design changes in a manner as determined by the ACO. Process major design changes to drawings and specifications in the same manner as that for an original FAA-PMA.
- 2) The FAA accepted the ICA approach for the above articles with their designs. These ICA may refer to those of the respective articles from the holders of type certificates. Otherwise, provide supplemental ICA for differences in the replacement articles. Make referral statements or supplemental ICA readily available per 14 CFR 21:50.

#### PALL AEROPOWER CORPORATION

NEW PORT RICHEY, FLORIDA 34654-5198 INSTRUCTIONS FOR CONTINUED AIRWORTHINESS PAC PN CE01303F2ICA

#### SCOPE 1.0

This procedure describes the installation of an Inlet Barrier Filter (IBF) on all Airbus Helicopters AS350B, AS350B1, AS350B2, AS350BA and AS350B3 helicopters, modified in accordance with STC number SR00811SE.

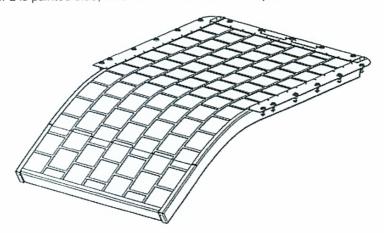

This modification and installation instruction is to be used in conjunction with FDC ICA 1350-SERIES-ICA-1 which describes the installation of the IBF system.

#### **DESCRIPTION** 2.0

This PMA modification allows for the replacement of STC holder PN 1350A2-1 with PAC PNs CE01303F2 or CE01303F2B. PAC PN CE01303F2 and CE01303F2B are one-for-one replacements of the existing STC holder. Use of PAC PMA IBF will not impact the form, fit or function of the inlet barrier filter system.

Installation of the PMA IBF (PAC PN CE01303F2 or CE01303F2B) significantly reduces the maintenance burden associated with inlet barrier filter system. The PMA IBF is an un-oiled, dry media element and is simply cleaned using water; eliminating the need for cleaning solvents and specialized oils.

The PAC PMA designs are identical with the exception of the IBF frame paint color. PAC IBF PN CE01303F2 is painted blue; PAC IBF PN CE01303F2B is painted black.

Inlet Barrier Filter Element Figure 2-1:

# NEW PORT RICHEY, FLORIDA 34654-5198 INSTRUCTIONS FOR CONTINUED AIRWORTHINESS PAC PN CE01303F2ICA

#### 3.0 LIST OF APPLICABLE DOCUMENTS

The following documents provide information regarding operation, installation and maintenance:

- PAC Top Assembly Drawing: CE01303F2G, Revision or later FAA approved revision
- FDC ICA 1350-SERIES-ICA-1

### 4.0 INLET BARRIER FILTER ELEMENT REMOVAL AND INSTALLATION

This procedure applies to the removal and installation of the Inlet Barrier Filter Element from the Inlet Barrier Filter System installed in all Airbus Helicopters AS350B, AS350B1, AS350B2, AS350BA and AS350B3 helicopters, modified in accordance with STC number SR00811SE.

Removal and installation of the PMA IBF (PAC PN CE01303F2 or CE01303F2B) shall be accomplished in accordance with FDC ICA 1350-SERIES-ICA-1 except PAC PN CE01303F2 or CE01303F2B shall not be oiled prior to installation.

The PMA IBF (PAC PN CE01303F2 and CE01303F2B) is a direct one-for-one replacement for STC holder PN 1350A2-1.

#### 4.1 Scheduled Maintenance Interval

The inlet barrier filter element service interval is dependent on the specific aircraft operating environment. Section 4.0 of FDC ICA 1350-SERIES-ICA-1 describes the general, specific, and severe environment service interval requirements.

#### 5.0 MAINTENANCE CLEANING PROCEDURE

- 1. Use municipal tap water at 25-40 psig pressure at ambient temperature. Use a commercial garden hose spray nozzle or equivalent at 1" to 1-1/2" stream diameter held at a minimum distance of 6" from the inlet barrier filter element surface.
- Starting on the downstream side, apply water between each pleat, holding the nozzle at about a 45 degree angle to the pleat. Move the nozzle along the space between the pleats.
- 3. Turn the inlet barrier filter element over to expose the upstream side. Apply the water stream with the nozzle held at a steep angle to the pleats and sweep it across the surface of each pleat.
- 4. Repeat steps 2 and 3.
- 5. Record cleaning cycle on inlet barrier filter element nameplate.
- 6. Remove excess water and install in accordance with 4.0.
